3B. REVIEW (10)

Route	Issue
/api/analytics	Falls back to mock data — verify if real data path ever returns
/api/browser-agent/opengov	No UI page links to it — may be n8n-called only; document or wire up
/api/campaigns/create	Templates stored in memory only — data lost on restart

4B. REVIEW (3)

Page	Issue
/analytics	In Navigation but /api/analytics has mock fallback — verify data quality before keeping
/campaigns	Templates are in-memory only — data lost on restart; needs persistence or remove from nav
/find-subs	Verify if backed by live /api/subs or using local mock data

4C. ARCHIVE (1)

Page	Reason
/admin/automation-status	Hardcoded mock status — superseded by real /runs page

5. CODE — COMPONENTS

5A. REVIEW (1)

Component	Issue
Navigation.tsx	Missing routes: /intelligence, /discovery, /opportunities, /companies are not in nav. Has routes (/campaigns, /analytics) that depend on in-memory-only APIs. Nav needs audit/sync with actual active routes.
